

# Environmental Statement

## Principles – Menzies Distribution

“recognises that its operations impact upon the environment and that, as a result, it has a responsibility towards overall environmental stewardship.”

“accepts its responsibility to plan, manage and conduct such operations in a manner which demonstrates due regard for the environment and minimises adverse impact, so far as is reasonably practicable.”

“recognises that effective environmental practices are an integral part of overall best business practice and form part of responsible commercial activity.”

“encourages waste minimisation, re-use and recycling, energy efficiency and commitment to sustainable developments, so far as is practicable.”

“recognises the value of industry-wide standards and commitment embracing both legislative and voluntary matters, and will work progressively with relevant trade bodies towards developing best practice guidance.”

Menzies Distribution  
is committed to best environmental  
management practices

- Comply with relevant legislation and standards
- Consider environmental issues in decision making
